CLARENCE JARANILLA

Junior Software Developer

Tanza, Cavite, Philippines | clarencejaranilla2@gmail.com
Github | Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Junior Software Developer with hands-on experience building full-stack web applications, e-commerce platforms, and database-driven systems. Skilled in React, TypeScript, Python, and PostgreSQL, with practical experience in payment integration, inventory management, and responsive web development.

PROJECTS & RELEVANT EXPERIENCE

Gift Card Savers | Full-Stack Web Developer

Paid Client Project | Next.js, TypeScript, Prisma, PostgreSQL

- Developed a full-stack e-commerce platform for digital grading vouchers.
- Integrated payment gateways, currency conversion, and digital voucher management.
- Built administrative dashboards for inventory management, order tracking and customer transactions.

HD PARFUMS | E-Commerce Web Developer

Paid Client Project | Web Development

- Developed and deployed a responsive e-commerce website for a fragrance business.
- Implemented product catalog, inventory management, and order processing features.
- Designed user-friendly interfaces and administrative tools for business operations.

Smart Personal Finance Tracker | Software Developer

Personal Project — In Progress | Python, SQLite, React

- Developing a personal finance application for tracking income, expenses, and transactions.
- Implementing database-driven financial management functionality.
- Working toward an interactive dashboard for financial monitoring.

Arduino Robotics | Academic Project

Arduino Uno, C++

- Participated in the development of an Arduino-based robotics project.
- Applied programming fundamentals to hardware control and automation.
- Gained practical experience in robotics, debugging, and hardware-software integration.

EDUCATION

Lyceum of the Philippines University - Manila
BACHELOR OF SCIENCE IN COMPUTER SCIENCE -MAJOR SOFTWARE ENGINEERING
2023 - PRESENT

Lyceum of the Philippines University - Manila
STEM - ROBOTICS SHS
2021-2023

TECHNICAL SKILLS

- Programming: Python, JavaScript, TypeScript, C++
- Frontend: React, Next.js, HTML, CSS
- Backend & Database: Flask, SQLite, PostgreSQL, Prisma, Supabase, Firebase
- Tools: Git, GitHub, Vercel, VS Code
